

# NEW E360

Smart Residential Electricity Meter  
for the Internet of Things Era

Landis+  
Gyr  
manage energy better

**Flexibility** provided by the unique modular & integrated design. Adjustable functionality in the changing regulatory, technology and business environment; headroom for future upgrades.

**Security** guaranteed with E2E data encryption, configurable role-based access and certifications according to the highest industry standards. Fully GDPR compliant.

**Measurement capabilities** up to 10 times faster than with today's residential meters. Superior accuracy and innovative power quality functionality.

**Installation efficiency** through modular design that eliminates needs for separate gateways in RF and G3-PLC networks; any meter can be equipped with a gateway module.

**Universal connectivity** offering all LTE, G3-PLC and RF on a single IoT communication platform, providing optimized solution to various customer environments and needs.

**Minimized Total Cost of Ownership** during the long lifetime of the device. Communication subscription fees for the entire lifetime can be purchased upfront.

IDIS compliant. Designed and manufactured in an ISO 9001, 14000, 45001 and 27001 certified environment.

**Get in touch! Please contact your local sales office.**
